

TR54

RUGGED AND MODULAR TABLET DESIGNED FOR ENTERPRISE MOBILITY

Enterprise-Grade Performance & Power

The TR54 is engineered to meet the demanding requirements of frontline operations. With 8GB RAM and 128GB UFS storage, the TR54 delivers smooth multi-tasking and high-speed performance for intensive enterprise applications. The high-performance processor enables seamless execution of real-time data capture, inspection, and asset tracking tasks. 8,000mAh hot-swappable battery minimizes downtime during shift changes in logistics, manufacturing, and field service environments.

Advanced Connectivity for Every Environment

To support uninterrupted workflows, the TR54 is equipped with Wi-Fi 6E, Bluetooth 5.2, and optional LTE connectivity. These technologies enable fast, stable wireless communication across various environments—from indoor facilities such as hospitals and warehouses to remote or mobile job sites—ensuring real-time access to systems and data.

Flexible Scanning & Input Options

Designed to accommodate a variety of workflows, the TR54 offers optional 2D scanners with straight or 45° downward angles, enhancing usability and scanning efficiency in different operational setups. Its glove-compatible touchscreen allows for smooth input even in industrial or clinical environments, supporting rapid barcode scanning and data entry in fast-paced settings.

Built Tough with Enterprise Versatility

Built for durability, the TR54 is IP65-rated for water and dust resistance and tested to withstand drops, vibration, and daily wear in harsh environments. A comprehensive lineup of accessories—including hand straps, docking stations, expansion modules, and vehicle mounts—ensures seamless integration into workflows across industries such as healthcare, warehousing, retail, and utilities.

Versatile In-Display NFC for Customer Engagement

The TR54 features integrated in-display NFC technology, empowering enterprises to deploy a wide range of customer-facing applications—from contactless SoftPOS tap-to-pay and secure badge authentication to loyalty program interactions. This built-in capability streamlines transactions and access control, delivering a frictionless experience across retail, hospitality, healthcare, and field operations.

ENTERPRISE SOLUTIONS

PMDM (Point Mobile MDM) is a mobile device management solution for managing and monitoring your Point Mobile Android devices.

Centralized management of enterprise devices is vital for better productivity. You should provide a device configuration so that the workers can concentrate on their work with the device, and reduce device downtime by enabling predictive maintenance for battery replacement.

Makes it easy to create single-purpose devices. You can improve workforce productivity and control user's access boundaries – Restricts device usage to authorized applications only, ensuring controlled access.

PULS – Android™ UPDATE & SECURITY

PULS is a Point Mobile's lifetime solution, which provides the Android-based Point Mobile enterprise devices with security patches for up to seven years after a product launch.

Stay up-to-date with the latest security updates for up to 7 years
Conveniently update your devices in the field by FOTA
Update Android Versions and use new features via PULS***
